Dear Sir/Madam:

I make this request pursuant to the *Freedom of Information and Protection of Privacy Act*.

Page 12 of the *First Quarterly Report 2006/07* says:

“Over the three years, revenue from miscellaneous sources is up \$109 million, \$115 million and \$63 million mainly due to higher school-generated funds in school districts and an improved own-source revenue outlook from health authorities.”

This request is for any documents that comment on or explain the increase in school-generated funds and health authority own-source revenue. Without limiting the generality of this request, it is specifically for any details on school-generated funds by school district showing the increase between what was budgeted in February 2006 and what was reported in the *First Quarterly Report*, and for any details on health authority own-source revenue by health authority showing the increase between what was budgeted in February 2006 and what was reported in the *First Quarterly Report*. This request is also for any details on the composition of school-generated and health authority own-source revenue which identifies reasons for the revenue including, but not limited to, the amounts raised as a result of cafeteria programs, vending machines, international students and user fees for courses and, in hospitals, charges for diagnostic procedures.

Sincerely,

David D. Schreck
